

## New Products for 2008....

### **SecureMasterUSA M4-100MB Standalone DVR**

The M4-100MB Mini-Mobile DVR is a small, revolutionary DVR that records to an SD or SDHC memory card instead of a hard drive. This feature makes it easy and inexpensive to replace and preserve recorded images.

Unlike most other small DVRs, this unit uses the latest H.264 compression techniques, which allows images to be viewed and recorded in Real Time at very high resolution.

It supports WIFI, Central Monitoring Software, Motion detection, PTZ control, SD Card technology, Audio, and TCP/IP.

For more information, contact [Sales@SecureMasterUSA.com](mailto:Sales@SecureMasterUSA.com)
